

# ERIK CORREA

New York, NY · +1-708-200-5780 · erikcorrea444@gmail.com · linkedin.com/in/erik-correa

## SKILLS

JavaScript, React, Python, MongoDB, Node.js, Express, Jenkins, Groovy, HTML, CSS, AWS, Terraform, Kubernetes, Docker, Jules, Go, Shell Script, Django, C#, MySQL, PostgreSQL, Swift

## EXPERIENCE

### Software Engineer - JPMorgan Chase & Co, New York, NY

Oct 2021 – Present

- Developed and deployed a dashboard application that is used to visualize the status of various applications' Kubernetes clusters, utilizing Java, Groovy, and Jules.
- Collaborated with a team to create a CLI tool with GO that will be used to compile/assemble code from versioned, curated YAML templates.
- Utilized boto3, moto, and pytest to develop tests for various AWS Lambdas..

### Software Engineering Fellow - General Assembly, Chicago, IL

Sep 2020 – Oct 2020

- Software Engineering Immersive specializing in full-stack development. Over 400+ hours invested into this professional training program.
- Developed full-stack applications and designed REST APIs with full CRUD using MongoDB, Express, React, Node, Python, and Django.
- Managed team-based projects using Git version control, Figma, Github, and Slack.

### Restaurant Manager - Willow Springs Family Restaurant, Willow Springs, IL

May 2015 – Sep 2021

- Managed front and back of house for a smooth functioning operation while maintaining a high standard of customer satisfaction.
- Developed close relationships with clients and analyzed their needs to develop and build menus to ensure top-level customer service, retention, and referrals.
- Worked directly with suppliers to ensure that deliveries for the restaurant's food and supplies was at high standards for our customers

## PROJECTS

### Spanish Flashcards - [github.com/flash-card](https://github.com/erikcorrea/flash-card)

- Built a front-end web application with HTML/CSS that allowed users to study some of the most used phrases in the Spanish language.
- Utilized javascript to take out cards in the array when they were correct and stay when they got it wrong in the self-scoring game.

### Trending News - [github.com/news-project2](https://github.com/erikcorrea/news-project2)

- Incorporated two 3rd party APIs to get trending news from different news sources and get the weather of my current city and display them on the page.
- Dynamic thumbnails for all of the trending news had links to send you to the original news source to read more on that current topic.

### Orange Blog Page - [github.com/Orange-Frontend](https://github.com/erikcorrea/Orange-Frontend)

- Worked with a team to construct a full-stack web application that allows users to create text posts on any topic they like after they have created an account and logged in.
- Created a backend to store a user's information and all the posts they make.
- Authorized users can create and edit their own posts if logged into their account.

## EDUCATION:

**Software Engineering Immersive(SEI)** General Assembly | Chicago | October 2020 - December 2020
